

## IMPROVE DECISION MAKING WITH A FULL-FEATURED, ROBUST REPORTING MANAGER

FX Analytics gives you the ability to report on operational and job information over a period of time, related to services performed, revenue, customer use, activity by location, and more. This information is beneficial both internally for management and externally to share with your customers. Stand out from the crowd by providing your customers with intelligent reports related to their current and past jobs.

### THREE MAIN AREAS OF REPORTING FUNCTIONALITY

#### REPORTING

FX Analytics gives you access to reports that have been built into FieldFX for you. These reports were designed to suit the needs of most companies, and include both revenue and operations reports.

#### REVENUE REPORTS

- Revenue by Business Segment, Office, and Job Type
- Margin by Customer, Job, and Line Item
- Revenue Trend Reports

#### OPERATIONS REPORTS

- Crew Utility
- Equipment Utility
- Labor Hours Report

### FX FORMS REPORTING

FX Forms Reporting gives you the ability to run reports against the electronic form data created in FieldFX. Practically any information collected via E-Forms on FieldFX is reportable with this feature. Export the reports to Excel for additional analysis.

Create and manage custom reports

## CUSTOM REPORTS

Custom Reports empowers you to create reports that meet your specific needs, such as revenue by equipment for a specific office location. Drag and drop functionality and filtering make it easy to create an endless amount of reports. And as always, you can generate charts, save, and export for further review. Custom Reports runs on the industry-standard Microsoft® RDLC. Save reports to the Quote, Ticket, or other area within FieldFX so you can run them at your convenience. Reports can also be run while working remotely.

## POWERFUL REPORTS AT YOUR FINGERTIPS

- Generate powerful custom reports using data collected from field operations.
- Produce revenue reports including gross margin analysis by a variety of dimensions such as customer, business segment, and time.
- Generate reports that illustrate revenue by person or serialized equipment, number of jobs per month by office, and many more.
- Purchase Order Analysis reports allow you to clearly see what jobs and tickets have been performed against customer-issued PO's and work-orders for a project such as a large turnaround. See the consumption of the PO's and work orders over time on a ticket-by-ticket basis related to the amount of work remaining to complete the job. Use this report to keep your customer informed as to progress and budget.
- Generate charts for better visual representation.
- Save and export to Excel, PDF or Word for further analysis and review.

## COMPLETE MOBILE FIELD OPERATIONS MANAGEMENT SOLUTIONS

LiquidFrameworks' FieldFX product suite is a complete mobile field operations management solution, providing companies in the oil and gas, industrial and environmental services industries with the ability to organize and manage jobs, quotes, field tickets, equipment, contracts, price books, and labor, along with customer-specific electronic forms such as safety incidents, inspections and other operational data reports.
